

awacino

● NETWORK ACCESS, REINVENTED

Beam into your networks.

Your home, your office, your servers: reach them from anywhere, as if you were there. Direct, encrypted end to end, without opening a single port.

No open ports

Nothing for attackers to find. Router and firewall stay as they are.

Direct only

Your data never passes through our servers. No relay, no traffic limits.

Free to start

Free usage with 2 slots. Teams from €14.99 a month.

APPS FOR

iPhone & iPad

Mac

Android

Windows

Linux

● HOW IT WORKS

Two moves. Every network.

Install Awacino on one device in a network: a PC, a server, a NAS or a Raspberry Pi. From then on you beam out into it, and you beam others in.

BEAM OUT

Be in your network, from anywhere

- **The whole network:** PCs, NAS, databases at their usual address
- **All traffic through home:** online banking abroad, like on your sofa
- **One port only:** exactly one service, nothing else

BEAM IN

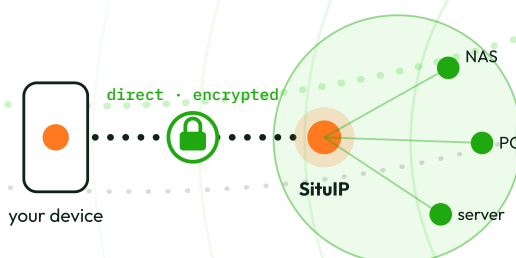

Let someone in, with one code

- **One code or QR code** for an IT partner, a colleague or a machine
- **You decide:** the network, the screen, or one port
- **Time-limited** and revocable at any time

● THE SITUIP

A real address inside the network

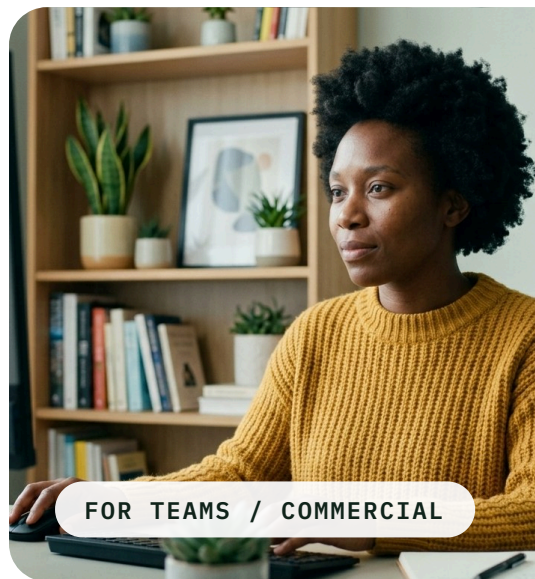

Your device gets an address from the network itself, often leased by its own router. Everything answers as if you sat at your desk. No VPN server, no client configs.

MADE FOR REAL LIFE

At work. At home. Everywhere.

FOR TEAMS / COMMERCIAL

The office network for the whole team

ERP, files and databases

at their usual address, from the hotel

Outside help, safely

one code for the IT partner, off when done

Home office without VPN box

the office PC, from your kitchen table

Your home, wherever you are

Start the car charger

from the tram, before you are home

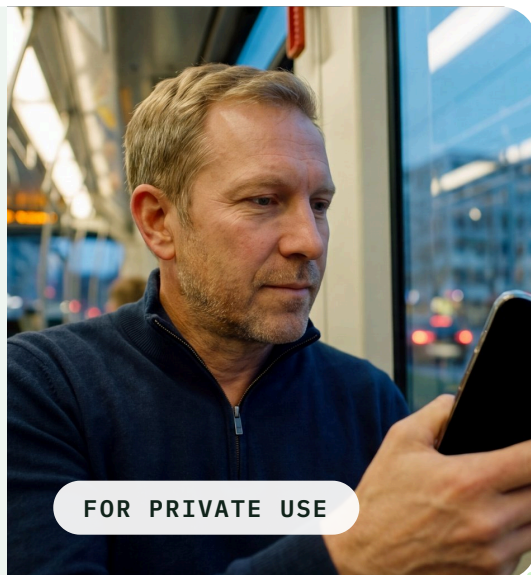

Your own PC from anywhere

with the remote desktop you already use

Abroad, but online from home

your bank sees you at home

FOR PRIVATE USE

24/7

Unattended access for servers, NAS and Raspberry Pi

The Unattended Client keeps Linux servers, NAS boxes (Docker) and Raspberry Pis reachable with nobody logged in. No admin rights needed where it lends its network.

WHY AWACINO

Awacino SitulP is your choice because

Your data stays yours

It never passes through our servers. No relay that could log or throttle anything.

No traffic limits

The connection is between your devices.

Connects everywhere

Behind CGNAT and on 5G too, where others need relays.

PRICING • SLOTS, NOT SEATS

FREE

€0

2 slots, free usage

BASIC

€14.99 /mo

5 slots

STANDARD

€49.99 /mo

20 slots · most chosen

PREMIUM

€99.99 /mo

50 slots

A slot is one device or one active Beam-in code; people are never counted. +€5 per extra slot a month; yearly billing saves 15 % or more.

Need more than 50 slots? Talk to us.

Fleets, machine builders and service providers get a plan that fits. Or download Awacino and start today, free.
